Dr. Achamma George

Principal

STRATEGIC PLAN :2016

After the second cycle of NAAC accreditation in 2015 , the following suggestions were made in tune with the NAAC committee recommendations.

· **A well established Website**

Website is the face of a college in the digital world. People around the world can understand our college through a well deployed website.

· **An Attendance Portal**

Attendance portal is highly beneficial to both students and faculty for the transparent dealing of attendance.

· **E-mails for faculty under college domain**

An email with high storage capacity and college identification is very useful for faculty.

· **Encourage departments to take initiative steps to start research centers**

Our College encourages active participation in research by faculty members which requires development of research facilities and research centers. We have an active Zoology research department. Other departments need to be active in research and establish research centers.

· **Encourage faculty to pursue Ph.D.**

For developing our research centers, faculty are encouraged to pursue PhD

· **Encourage faculty to adopt ICT enabled teaching methods**

In the modern era of blended teaching learning, we need to employ ICT enabled teaching.

· **Development of language lab and computer labs**

Language lab is very important for a college in improving the English language communication skill of students. Computer labs are essential for mathematics and physics students as computer programming is a part of their curriculum. ·

Modernization of College Library

In order to walk in pace and meet the demands of students we need to renovate and improve the facilities in our college library. Digitalization of the college library facilities is significant in this regard.

· **Renovation of Practical Labs of Science departments**

We need to renovate our practical labs and bring new experimental set ups for the changing demands of the curriculum.

· **Acquire new Courses for the college**

New courses need to be introduced in the institution. The main objective is to help students to meet the modern course demands of students.

· **Encourage students to participate in extra certificate courses**

Online certificate courses offered by MHRD, SWAYAM-NPTEL and AICTE are good to develop self-learning aptitude in students.

· **Introduce add-on/certificate course by the college**

Add-on/certificate courses are the need of today's education.

· **Rain water harvesting**

Our college is situated in a hilly and high temperature region of Kerala. During the summer season we usually face water scarcity. So rain water harvesting is essential in our college.

· **Energy conservation**

Upon the increasing demands of energy resources we need to keep our energy consumption optimized without unwanted energy leakage.

· **Solar power system**

As part of energy conservation and adopting alternative renewable energy resources we need to establish solar power system in our campus.

· **Green Campus**

Our college is situated in greenery but hot region. We need to keep the greenery environment of our campus intact, plastic free and less polluted.

· **Proper waste management**

Waste management is essential to keep our campus clean and green without pollution.
