

International Webinar on “Writing a Research Proposal: Tips for Students and Researchers”

Webinar on “A Future in Chemistry”

REC Praveen Prakash is presenting

VARSHA P and 79 more 7:36 PM

SCOPE OF CHEMISTRY

- ❖ Chemistry is the branch of science dealing with the **study of composition, structure, and properties of matter**
- ❖ It deals with the **study of the changes which different forms of matter** undergo under different conditions and also with the **laws governing these changes**

Modern research in chemistry can lead to technologies that aim to **benefit the environment, conserve and produce energy, improve human life, and expand our knowledge of the universe**

- ❑ **Energy and the environment**
Chemistry is helping us to cope with increasing pressures on energy, food, water and other scarce natural resources and to live more sustainably
- ❑ **Lifestyle and recreation**
From skincare to sport... chemistry is all around us
- ❑ **Human health**
Chemistry is helping to improve and maintain human health for all in a rapidly changing world

WEBINAR
